-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7, 8, 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Green (US 5,868,290). Green illustrates a method and device of donning gloves with the cuff of the glove being directed upward, with the opening of the cuff via opening means (vacuum) activated by the pedal 58 would be sufficient to enable a hand to be inserted. It would be inherent that a force sufficient to disengage the gloves will be made, as it would be required to don the gloves. Green further illustrates the two cuff edges being divided into a back side and a palm side, with the palm side being closer to the little and ring fingers compared to the back cuff edge; the palm cuff edge is also the lower of the two edges and is placed in front by the engaging portion located above the lower cuff edge.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Green (US 5,868,290) in view of Grinsberg (US 5,806,099). Green teaches the glove substantially above. Green does not teach holes in the glove used to attach the glove to holding rods. Grinsburg teaches a glove including through holes and a frangible portion (perforated slit) between the cuff edge and the through holes. It would have been obvious to one of ordinary skill in the art to combine the glove of Green with the through holes of Grinsburg to provide a means for storage in a organized manner.

#### ***Allowable Subject Matter***

Claims 4-6 and 13-14 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form PTO-892.
